SAVEETHA SCHOOL OF ENGINEERING
SAVEETHA INSTITUTE OF MEDICAL AND TECHNICAL SCIENCES
COMPUTER SCIENCE AND ENGINEERING PROGRAMME

DAY 1- C PROGRAMMING-LAB EXPERIMENTS

1. Compile and Execute the C program to calculate Arithmetic Operators Functions.
2. Compile and Execute the C program to change all the digits of a number to bring the digit at the last position to the first position and vice-versa using loop.
3. Compile and Execute the C program to find the Factorial of a positive integer
4. Compile and execute the C program to find the perfect number or not.

5. Compile and Execute the C program to find whether the person is eligible for vote or not.

6. Compile and Execute the C program to check whether the number divisible by 2, then print the given number even otherwise odd.
7. Compile and Execute the C program to print numbers from P to Q but except the digit R using continue statement.
8. Compile and Execute the C program to print the multiplication table of number m up to n.
9. Compile and Execute the C program for checking out whether a given year is a leap year or not.
10. Ask the user to enter any positive integer. Then divides the given number into individuals and adds those individual (Sum) digits. Compile and execute the c Program
11. Permutation refers number of ways in which set members can be arranged or ordered in some fashion. Compile and execute the C program to print unique permutations of a given number.
12. Write a program using function to calculate the simple interest. Suppose the customer is a senior citizen. He is being offered 12 percent rate of interest; for all other customers, the ROI is 10 percent.
13. Ask the user to enter any positive integer. Compile and Execute the C program to check whether the number is Strong number or not.

14. Write a program to print n prime numbers then find the n^{th} Prime number
15. A Pythagorean Triplet is a set of three integers m, n and o such that $m^2+n^2=o^{2.}$
    Given a limit A, generate all Pythagorean triples with value smaller that given limit A**?**
