UNIT 5 – Questions

Easy Questions

1. Write a program to read name and roll number of n number of students from user and store them in a file.

Sample input
Enter the roll number: 101
Enter the name :aaaa
Sample Output:
(File Name Student.txt)

101
Aaaa
Test Case:

1. 105, ccccc
2. 101A, invalid
3. 10_1, invalid
4. 110, bbbb
5. 100, dddd

2. Write a C program to display the contents of a file.

Enter the file name :sample.txt

Output:
this is myPractice Program

Test Case:
Sample.txt
sample1.txt
S123.txt
S@12.txt
Sample S.txt

3. Write a C program to copy the contents of one file to another.

INPUT: a.txt

OUTPUT: 57 bytes copied from ‘a.txt’ to ‘b.txt’
2 files closed

Test Case
Sample.txt

sample1.txt
S123.txt
S@12.txt
Sample S.txt

4. Write a C program to merge two files into a third file.

Enter first file name : a.txt
Enter second file name:b.txt
Enter destination file name: c.txt

Output:
File Merging Sucessfull

Test Cases
Sample.txt , a.txt
sample1.txt, a.txt
S123.txt, a.txt
S@12.txt, a.txt
Sample S.txt, a.txt

5. Write a C program to reverse the first n characters in a file by specifying the file name and n on the command line

Input: source.c

this is source
Ouput:
source.c
this is source ecruos si siht

Test Case
Sample.c
sample1.c
S123.c
S@12.c
Sample S.c

6. Write a C program to handle the situation where the file required to be read is not available in the store.

   Input:

   Enter Name of file to open for reading: text.txt

Output:

The file is not found.

7. File Manipulation - Open a file using the function fopen() and store the reference of the file in a FILE pointer. Read contents of the file using any of these functions fgetc(), fgets(), fscanf(), or fread(). File close the file using the function fclose().- Write a program in C to implement the sequence of operations defined as above.

   Input:

   Enter name of file to open: text.txt

   Enter the text: This is a test text.

   Output:

   The file is successfully opened.

   Test Conditions:

   a. Test.txt
   b. File1.c
   c. File empty

8. Write a C program to read entire contents from afile and print the contents in to the screen.

   Input:

   Enter the name of file for reading: firsttest.txt

   Output:

   There is everything inside you expected to be in this file.

9. Write a C program to read contents from the keyboard and write it into the file.

   Input:

   Enter text to input: This is a test information for checking to be displayed.

   Output:

   Information written on Screen:

   This is a test information for checking to be displayed.

10. Write a C program to read the content from the keyboard and append the content in to the existing file.

    Input:
    Enter the name of file for reading: test1.txt
    Enter number to append: 66 77 88 99
    Output:
    11 22 33 44 55
    66 77 88 99

    Test Conditions:
    a. File. Text
    b. Test1.text
    c. Empty file.

Moderate Questions

1. Write a C program to read contents from the keyboard and write it into the file.

   Input:
   Enter Name of file to write: Test1.txt

   Enter to write:
   This is a very good text found while tested.

   Output:
   Write operation successful!!!

   Test Condition:
   a. Text.txt
   b. Test1

2. Write a C program to merge the two text files.

   Input:

   Enter file 1: Test1.txt

   Enter file 2: Test2.txt

   Output:

   Merge Successful!!!

   The merged Content:

   11 22 33 44 55 66 77 88 99

   This is a very good text found while tested.

3. Write a C program to read the content from a file and print equivalent ASCII values of each character.

   Input:

   Content in file:

   A E I O U

   Output:

   65 69 73 79 85

4. Write a C program to delete a file in the system using SYSTEM commands.

   Input:

   Enter the name of file to be deleted: ram.c

   Output:

   The file is deleted successfully!!!

   The file is not deleted!!! (In case file to be deleted is not available in store.)

.

5. Write C program to Reverse File Contents.

   Input:

   Enter Name of file to open: file1.txt

   file1.txt has:
   This is line one
   This is line two
   This is line three
   This is line four
   This is line five

   Output:
   This is line five
   This is line four
   This is line three
   This is line two
   This is line one

7. Write C program to Copy file contents to another file.

   Input:

   Enter the filename to open for reading

   file3.txt

   Enter the filename to open for writing

   file1.txt

   Output:

   Contents copied to file1.txt successfully!!!

8. Write C program to Count the number of words in a line and number of lines in a file.

   Input:

   Enter file to open: lines.txt

   Output:

   No. of words in a line = 23

   No. of line in file = 6

9. Write a program in C to read the file and store the lines into an array.

Test Data :

Input the file name to be opened : test.txt

Expected Output :

The content of the file test.txt are :
test line 1
test line 2
test line 3
test line 4

Test cases

Sample.txt
sample1.txt
S123.txt
S@12.txt
Sample S.txt

10. Write a program in C to encrypt a text file. Go to the editor

    Test Data :

    Input the name of file to encrypt : test.txt

    Expected Output :

File test.txt successfully encrypted ..!!

[If you read the file test.txt you will see the following :
]

Test cases

Sample.txt
sample1.txt
S123.txt
S@12.txt

Sample S.txt
